

I claim:

1. A repetitive language kit comprising;

a plurality of pages having binder and outer edges;

a photographic site proximate the surface of at least one of said pages configured to

5 receive a pictorial representation;

a caption site proximate the surface of at least one of said pages and corresponding to said photographic site, said caption site configured to receive text which is repetitive throughout the pages; and

a binder for securing said plurality of pages proximate said binder edges.

2. The repetitive language kit of claim 1 wherein said caption site is configured to receive personalized text corresponding to the pictorial representation of said corresponding photographic site.

3. The repetitive language kit of claim 1 wherein said binder is selected from the group consisting of lace, ribbon, string and yarn.

4. The repetitive language kit of claim 3 wherein said caption site is configured to receive personalized text corresponding to the pictorial representation of said corresponding photographic site.

5. The repetitive language kit of claim 3 wherein said pages have at least one perforation proximate said binder edges for receiving said binder.

6. The repetitive language kit of claim 5 wherein said photographic site and said corresponding caption site are proximate facing pages when the book is open to said facing pages.

7. The repetitive language kit of claim 5 wherein said photographic site and said corresponding caption site are proximate the same page.

8. The repetitive language kit of claim 5 wherein said pages further comprise front and back covers.

9. The repetitive language kit of claim 1 wherein each of said pages has two substantially parallel binder edges and a fold line between binder edges for folding said page to form a receptacle.

10. The repetitive language kit of claim 9 further comprising:

a border delineated by a cut away portion of said photographic site, wherein said receptacle is configured to receive a pictorial representation for viewing through said border.

11. The repetitive language kit of claim 10 further comprising:

a plurality of cards having printed thereon repetitive text corresponding to the repetitive text of said caption site of said pages; and

a container for storing said pages, binder and cards, said container having printed thereon a title corresponding to the repetitive text of said caption site of said pages and configured for receiving personalized text.

12. A repetitive language book comprising:

a plurality of pages having binder and outer edges;

a photographic site proximate the surface of at least one of said pages configured to received a pictorial representation;

5 a caption site proximate the surface of at least one of said pages and corresponding to said photographic site, said caption site configured to receive text which is repetitive throughout the pages; and

a binder which secures said plurality of pages proximate said binder edges.

10 13. The repetitive language book of claim 12 wherein said caption site is configured to receive personalized text corresponding to the pictorial representation of said corresponding photographic site.

14. The repetitive language book of claim 13 wherein said binder is selected from the group
15 consisting of lace, ribbon, string and yarn.

15. The repetitive language book of claim 14 wherein said pages have at least one perforation proximate said binder edges for receiving said binder, said binder is threaded through said perforations of said pages to form a loop proximate said perforations, the ends of said binder are
20 threaded through said loop and secured together for binding said pages along said binder edges for movement throughout an arc.

16. The repetitive language book of claim 15 further comprising:
- pictorial representations proximate said photographic sites; and
 - personalized text proximate said caption site.

17. A process for facilitating the reading skills of a pre-reader comprising the steps of :

providing a repetitive language kit comprising:

a plurality of pages having binder and outer edges;

a photographic site proximate the surface of at least one of said pages

5 configured to receive a pictorial representation;

a caption site proximate the surface of at least one of said pages and
corresponding to said photographic site, said caption site configure to receive text which is
repetitive throughout the pages; and

a binder for securing said plurality of pages proximate said binder edges;

10 memorializing an experience of the pre-reader through pictorial representations;

affixing said pictorial representations proximate said photographic site of said pages;

personalizing said pictorial representations with text proximate said caption site; and

binding said pages with said binder.

15 18. The process for facilitating the reading skills of a pre-reader of claim 17 wherein said
binder is selected from the group consisting of lace, ribbon, string and yarn.

19. The process for facilitating the reading skills of a pre-reader of claim 18 wherein said pages further comprise front and back covers for securing said pages therebetween and said covers and pages have at least one perforation proximate said binder edges for receiving said binder, said binder is threaded through said perforations of said back cover, pages and front cover to
5 form a plurality of loops proximate said front cover perforations, the ends of said binder are threaded through said loops for securing together.

20. The process for facilitating the reading skills of a pre-reader of claim 19 further comprising the step of reading said pages to the pre-reader.
